# PROJECT CRAW WORKSHEET

| 17. Environmental Risks                                                     | Y/N | Action required / Comment                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Heritage site                                                               |     |                                                                                                                                                                                                                                                                                                                                     |
| Recycling on project                                                        |     | Solid waste will be segregated into oily, recyclable and general waste. Where this is not practical due to physical space requirements on site or unviable low volumes, the preferred option will be to engage waste disposal contractors that provide sorting, segregation, and recycling options and will provide waste reporting |
| Will Spill kit, trade waste washout, concrete washout be required?          |     | Spill kits on site, concrete washout bay with bunding and signage required, substances to be stored in bunded container in accordance with SDS, drip trays to be used                                                                                                                                                               |
| (Review Project Environmental Aspects & Impacts Register)                   |     | Refer relevant Codes of Practice                                                                                                                                                                                                                                                                                                    |
| 18. Health Monitoring and Atmospheric Monitoring                            | Y/N | Action required / Comment                                                                                                                                                                                                                                                                                                           |
| Asbestos                                                                    |     |                                                                                                                                                                                                                                                                                                                                     |
| Crystalline Silica - earthworks, demolition, natural stones/marble products |     | Drilling, Coring, Cutting - template on site and cut off site. Wet cut, vacuum extraction, isolate areas of work, PPE including respirators/P2 masks to be worn. Risk assessed prior to works.                                                                                                                                      |
| Diesel Exhaust Emissions (enclosed/semi enclosed areas)                     |     |                                                                                                                                                                                                                                                                                                                                     |
